**EVENT SAFETY IN DEALING
WITH SARS-COV2**

Safety and Hygiene - Dealing with Sars CoV 2

Legend Responsibilities:

AREAL BÖHLER

ORGANISER + AREAL BÖHLER

ORGANISER

Instructions for participants

In case of suspected illness, please stay away from the event

Especially cough, cold, hoarseness, headache, pain in the limbs or increased temperature

>37.4°C, can be signs of an infection. Please protect your fellow human beings and stay away from the event if you have any symptoms.

Keep at least 1.5 metres away from other people.

This recommendation applies equally to all persons: to protect yourself and others from contracting SARS-CoV-2, the most important and effective measures are self-isolation in case of illness, good hand hygiene, observance of coughing and sneezing rules and keeping a distance (at least 1.5 metres). Please keep your distance from other people and follow the directions at the event.

Wash hands regularly and thoroughly with soap.

This recommendation applies equally to all persons: after contact with body fluids (e.g. sneezing, blowing nose), after using the toilet, after taking off protective clothing (gloves, mouth/nose protection), after cleaning work. Rub in for approx. 30 seconds, paying attention to the wrists, interdigital spaces, fingertips, thumbs and nail palms. Sufficient washing facilities are available at the event. In the sanitary facilities and at the entrances you will find hand you will also find hand disinfection dispensers.

Keep hands away from face, eyes and mouth - refrain from shaking hands.

Mouth/nose/mucous membrane contact with contaminated hands increase the likelihood of infection. Please try to keep your hands away from your face. Please refrain from shaking hands and other physical contact with other people.

Sneezing etiquette

Increase the safe distance from other people when coughing and blowing your nose. Please use a paper handkerchief or the crook of your arm.

Mask obligation - wear mouth-nose protection

Mouth-to-nose covering can intercept infectious droplets that are emitted, for example, when speaking, coughing or sneezing. The risk of infecting another person by coughing, sneezing or speaking can thus be reduced (protection of others).

In addition, mouth/nose/mucous membrane contact with contaminated hands is made more difficult (egg protection). We would ask you to wear your personal mouth/nose protection. It is compulsory to wear a **medical protective mask** or an **FFP 2 mask** (without valve). Everyday masks, face shields or similar are **NOT** permitted. If it is not possible to wear the mouth-nose protection, for example when eating or drinking outside, please make sure to keep the minimum distance to your fellow human beings.

Covering wounds with plasters or bandages

If you have any wounds, please cover them with suitable plasters or bandages. Our paramedics will be happy to answer any questions you may have.

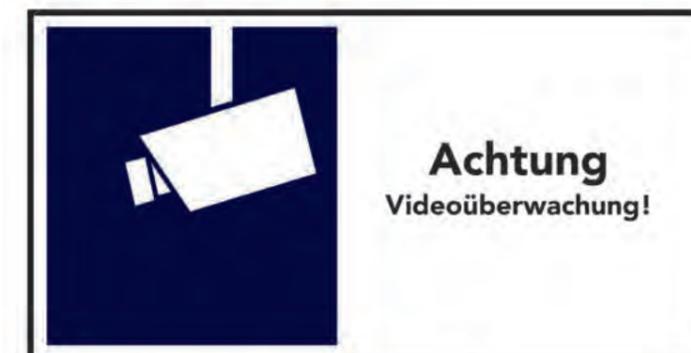

Safety and hygiene - Information for guests of the AREAL BÖHLER

Who can you contact if you have any questions?

- Orderlies
- Medical service
- Catering staff
- Cleaning staff
- Event-Team

Prevent infections: THE MOST IMPORTANT HYGIENE TIPS

1. Wash your hands regularly

- When you get home
- Before and during the preparation of meals
- Before meals
- After going to the toilet
- After nose blowing, sneezing and coughing
- Before and after contact with sick people
- After contact with animals

WET

Hold your hands under running water

SOAPING ALL OVER

Lather hands from all sides

TAKE TIME

Thorough soaping takes 20 to 30 seconds

WASHING OFF THOROUGHLY

Wash hands under running water

DRY OFF THOROUGHLY

Dry hands with a clean cloth

2. Keep your hands out of your face/avoid skin contact

- Do not touch mouth, eyes or nose with unwashed hands
- Temporarily avoid greetings by hugging or shaking hands

3. Proper coughing and sneezing

- Keep distance from others when coughing and sneezing and turn away
- Use a handkerchief or hold the crook of your arm in front of mouth and nose

4. Keep distance in case of illness

- Cure yourself at home
- Avoid close physical contact as long as you are contagious
- Stay in a separate room and use a separate toilet if possible
- Do not share crockery and towels with others

5. Protect wounds

- Cover wounds with a plaster or bandage
